

# C5 & C6 LICENSE PLATE LEDS

Using a #15 Torx screwdriver, remove the 2 screws holding the license light in place.

Remove the light housings, twist the grey socket 1/4 turn counterclockwise to remove it from the housing.

The bulb may be hot so use a shop towel to grab it and remove it.

Turn on the lights. Plug in the led bulb. If it doesn't light, turn it 180 degrees and re-insert.

Re-insert bulb socket into housing and twist 1/4 turn clockwise. Re-attach housing with the 2 torx screws and repeat for the second housing.
