Installation Manuals

Switch Assembly

Block Off
Parts

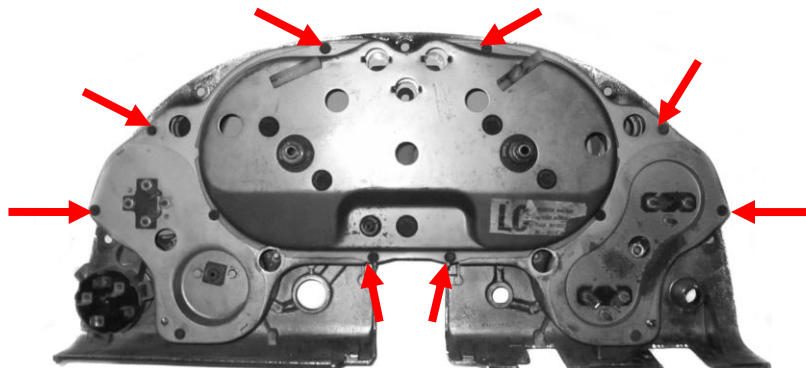

Main Harness

Control Box

Installation

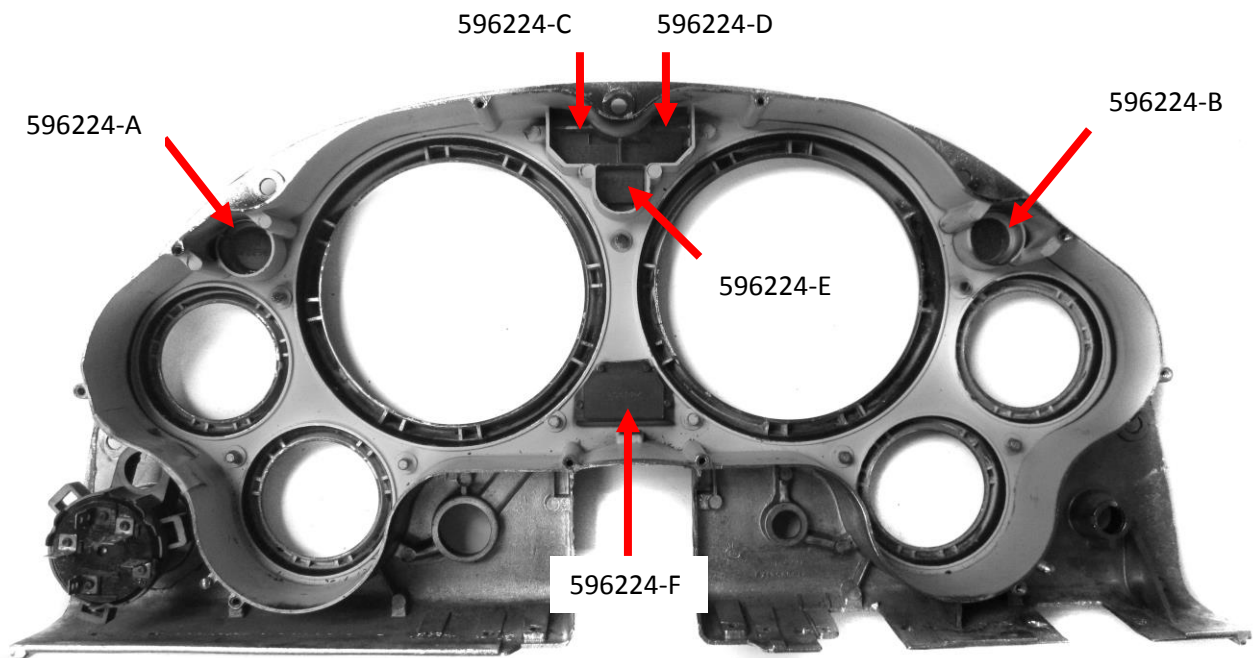

1. Remove the stock gauges from the dash. Remove the 10 screws holding the gauges to the bezel on the back of the system

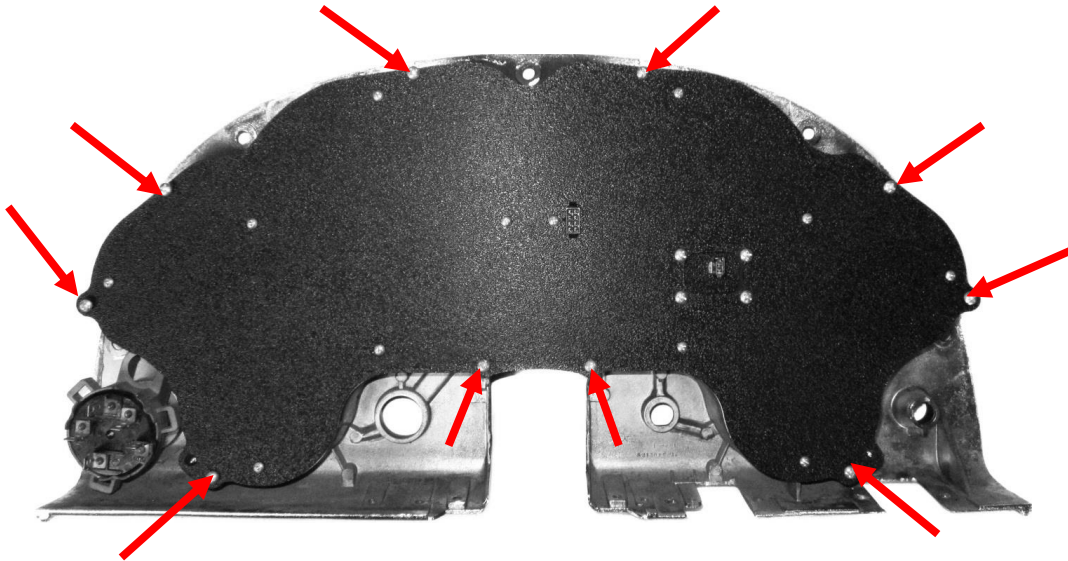

2. Remove the stock gauges. To remove the lens separator plate, remove the nuts. The only item to be reused is the original front bezel; the other pieces can be set aside.

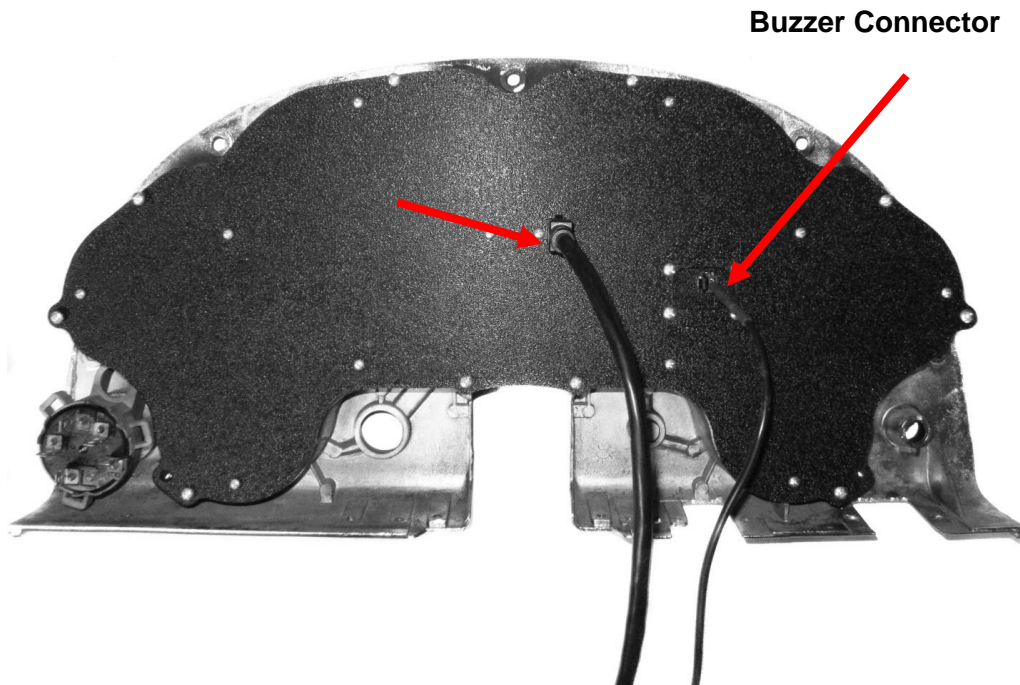

3. With the lenses and lens separator removed, place the included block off parts in the appropriate spaces. Use RTV silicone to secure the block off pieces in place. NOTE: Make sure the smooth side of the plastic with the part number is facing you when installing.

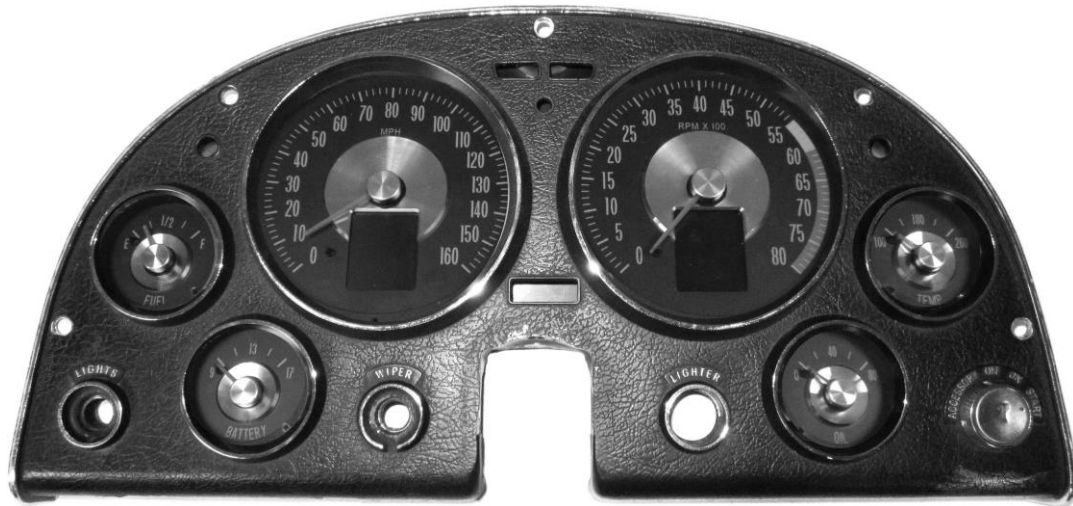

4. Using the 10 factory screws from Step One, secure the RTX gauge assembly to the bezel.

5. Connect the provided harness and the buzzer (optional for audio feedback) to the back of the RTX system.

6. Re-install the cluster into the car and refer to the main manual for wiring instructions to complete the RTX installation.
