1984-1987 Corvette Headlight Actuator Motor Upgrade Kit

Description

Now Available: the only sure way to eliminate the troublesome operation of the original 84-87 electric headlight actuator motors, wiring, and 3 relay operating system

- Everything is included in this simple kit to make a complete working installation
- No need to **remove** or **replace** or **modify** the original headlight motor "horseshoes"
- No work under the dash, no work under the car, no wheel removal
- No cutting or modifications to original equipment
- Kit contains a complete new headlight motor wiring harness
- Easy to mount module right on the wheel house where the relays were mounted, just drill two holes
- Easy to follow complete instructions included with pictures and drawings
- Uses New Corvette 1988-2004 style headlight actuator electronic module
- Uses New Corvette 2000-2004, new style headlight motors (rebuildable)
- Mounting brackets are power coated medium gloss black
- Wiring harness uses correct GM color wires and Delphi Weatherpack connectors
- Upgrade kit eliminates "jittery" and faulty operation caused by internal motor switches, contacts, and overloads, and also by factory relays, bad wiring, and bad connectors
- The original headlight motors are unbolted and removed, and the new mounting brackets and motors are bolted in! Really "Plug and Play"
- One Year Manufacturers Warranty
