INSTALLATION INSTRUCTIONS FOR THE C5 CORVETTE FRONT CORNER MARKER LIGHT GRILLES PART # C509-4

PARTS INCLUDED:

- ___ 2-Stainless Mesh Marker Light Covers
- ___ 1-Adhesive Promoter Tube

This new grille kit is a beautiful and unique accessory designed to be the finishing touch when added to your C5 containing our brake duct and front fog light grilles.

1. Thoroughly clean the corner marker to remove any and all road grime, dirt and wax. Apply the adhesive promoter provided along the entire perimeter of the marker light and allow a few seconds to dry.
2. Your new grilles have been sent to you flat in order to force you to shape the grille by hand. This will insure a nice perfect fitment. It is CRITICAL that the shape be perfectly matched in order to insure that the grilles do not become detached long term. This can be done with your hands very easily and if you think for a moment about the fact that metal will not bend itself out of place then you could expect that the grilles will stay perfectly in position so long as you do not apply the grilles using the adhesive attachment tape to maintain its shape. Take a little time to achieve a nice contour to the factory shape and your grilles will stay in place forever.
3. Now that you have achieved a nice contour of the grilles simply peel the release liner from the back of the grille and then carefully place them into position pressing firmly along the grille perimeter to insure a nice bond.

TECH TIP: American Car Craft has available a lenses blackout kit #C509-4A (ask your favorite Corvette Retailer how to order one). This kit is a thick lenses protector made of a dark smoke color. This kit will greatly enhance the appearance of the diamond mesh grilles offering a sleek sparkling look to the grilles. This appearance will also help the grilles to match the dark background of the brake duct and fog light grilles.

If any questions or problems occur during installation, please contact American Car Craft at 727 861-1500.

Thank You and Enjoy Your Purchase.
