- Made in the USA!
- A Great Addition to the Blockit "Quick & Quiet" Mats

Your driving experience matters!

It's simple, nothing creates fatigue & ruins a cruise in your ride faster then irritating interior noise!

Blockit Dead Mats use a unique technology to eliminate unwanted vibration & noise in your vehicle.

It's not your typical mass loaded vinyl. The light weight mats are a highly damped proprietary mineral filled viscoelastic polymer which provides outstanding sound & vibration reduction. At only .445 lbs per sq ft the performance to weight ratio is amazing. The bottom line is The Blockit Dead Mats are designed to simply not vibrate!

Tested via ASTM E756 method, using a 1 mm beam (approx 20 ga steel) @ 200htz, there was a 30% to 50% loss factor!

By adding Blockit Dead Mats you will receive drastic reduction in structural vibration. This will equate to a reduction in structural radiated borne noise.

The self adhesive backing makes for a simply cut and stick application. You can either completely cover an area, just a portion of an area or strategically place them with outstanding results. Blockit Dead Mats can be stacked to double up on vibration and noise reduction. Blockit Dead Mats, are fantastic on their own or in addition to compliment the *Blockit Quick & Quiet Mats*.

We know there are some areas that require damping and are **not** hidden or buried under carpet. The Blockit Dead Mats have a textured surface layer which is durable and has a nice clean look when exposed.
