Pre Cut Drop In Mats PLUS DeadMats For C6 & C7 Gen Corvettes

This kit combines **two** products to help create the next level of quiet!

The **Blockit Quick & Quiet system** reduces irritating interior noise fast by simply placing the pre cut mats right over your existing carpet! The Blockit Quick & Quiet mats are a unique 4 layer combination of real acoustical soundproofing which absorbs and suppresses unpleasant sounds. One large piece fits perfect in your cargo area. One piece goes behind each seat. All on top of the carpet. The durable UV protected top layer looks great and allows you to still use your cargo or trunk area.

We added our new **DeadMats** to this kit which will help you achieve even more noise & vibration reduction!

The DeadMats are applied under the carpet behind the seats. The carpet behind the seats easily lifts right up! A simple measure, cut, peel & stick is all it takes! Blockit Dead Mats use a unique technology to eliminate unwanted vibration & noise in your vehicle.

It's not your typical mass loaded vinyl. The light weight mats are a highly damped proprietary mineral filled viscoelastic polymer which provides outstanding vibration reduction. At only .445 lbs per sq ft the performance to weight ratio is amazing. The bottom line is The Blockit DeadMats are designed to simply not vibrate!

The combination of both products is fast and effective! It's perfect for taking that annoying edge off tire, road noise (especially certain states with certain roads that make tires whine), stock & some aftermarket exhausts. Helps keep the interior cooler.

Simple C6 behind seat install
